

## UNLOCK YOUR TURF'S TRUE POTENTIAL

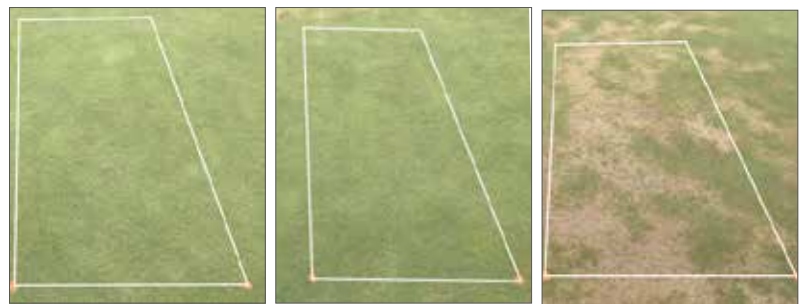

Zipline®, the new soil surfactant from Aquatrols, contains a blend of two high performance proven chemistries to aid with water management. Powered by AquaVita®, it also contains a proprietary technology specifically designed to aid turf care professionals to consistently deliver Fast, Firm, Fine Turf with soil resource enhancement.

Zipline promotes balanced hydration, unlocks bound nutritional elements and delivers consistent results on all turf types.

## BALANCED HYDRATION AND SOIL RESOURCE ENHANCEMENT FOR FAST, FIRM, FINE TURF

AquaVita Technology is a platform of proprietary technologies, resulting from an advanced bio-extraction process and designed to aid turf care professionals in optimising turf health. Each adaptation of the AquaVita Technology is specifically developed and paired with a unique blend of proven soil surfactant chemistry to address the specific needs of the targeted turf area.

The proven soil surfactants in Zipline break surface tension and optimise the moisture deep down into the soil profile. Once in place, the AquaVita Technology helps to maximise turf quality by enhancing the availability and retention of both applied and existing nutritional elements.

The AquaVita mineral solution bio-extract promotes nutrient assimilation in the soil, while the soil is hydrated with a combination of linear and etherified block copolymer surfactants suspending those nutrients which nurture the plant.

### Zipline's Roots

- 1 Aquatrols acquires Farmura Environmental with its history of environmentally sustainable products.
- 2 Aquatrols seeks to improve on the original Farmura bio-extraction method.
- 3 A new process gives rise to a family of bio-extract solutions.
- 4 A dual-action soil surfactant blend ideal for performance and AquaVita delivery is developed.

#### Zipline ProFacts

<b>WHAT IT DOES:</b>	Zipline powered by AquaVita Technology improves water infiltration from the surface through the rootzone and aids soil enhancement by unlocking existing bound nutritional elements.
<b>HOW TO APPLY:</b>	<ul style="list-style-type: none"> <li>• Apply Zipline through conventional spray equipment in a minimum of 200 L per hectare or 20 ml per m<sup>2</sup></li> <li>• Zipline is safe for turfgrass and does not need to be watered in immediately after application. However, since Zipline's area of activity includes both the thatch/mat layer and the soil, it should be watered in sufficiently to deliver Zipline to a depth of 75-100mm.</li> <li>• Zipline should be watered in thoroughly the evening following application.</li> </ul>
<b>APPLICATION RATES:</b>	Apply 6 - 26 L/Ha
<b>WHERE TO USE:</b>	Safe to use on all turf types.
