

WEST SURREY GC, GODALMING

"Redox is the first product I have used where I have total peace of mind."

Alec Macindoe

Golf Course Manager - West Surrey GC

GOLF COURSE MANAGER:

Alec Macindoe

ACCOUNT MANAGER

Peter Lacey

TYPE OF COURSE / TURF:

Parkland / Poa Bent

ISSUES

- Fusarium
- Anthracnose
- Nutrition Retention

PRODUCTS USED

Supreme

- Rate: 5L/Ha
- Frequency: Fortnightly

Si

- Rate: 5L/Ha
- Frequency: Fortnightly

OxyCal

- Rate: 4.5kg/Ha
- Frequency: Fortnightly

APPROACH

Together with Peter, we discussed what I was looking for and which products would help me produce a higher quality, consistent turf. The original programme included C-85, Supreme, Xpect, Si and OxyCal with rates that were put out on a monthly basis.

Although I was very happy with the results I saw in the early days, I wanted to increase the consistency in my greens so I moved onto a trickle feed approach with all the above products. We started breaking down the app rates in half and going fortnightly with the other 2 weeks of the month using Revolution. among other Aquatrols products.

Very quickly I was achieving the consistent quality I had been looking for.

RESULTS

The health of my turf has never been better. We have no peaks and troughs whatsoever. Clipping rates were almost identical throughout the whole year and we have much less requirement for nitrogen. Recovery after renovation works were quicker than previous years and I put this down to being in a better, healthier situation heading into renovation but also how quickly the soil and plant responded to aid recovery.
